

River Road Modal Performance

Participants were asked to report how often they used River Road by each mode: auto, bicycle, walking, and transit. For each mode they could respond 1=Daily, 2=Several Times/Week, 3=Several Times/Month, and 4=Seldom/Never. They were then asked to evaluate how well River Road provided adequate service for the different modes, where 1 = Unacceptable and 5 = Excellent. In general,

- River Road currently performs well only for automobiles
- River Road performs below neutral for all other modes
- This assessment did not vary significantly by respondents' current modal usages
- This assessment did not vary significantly by respondents' zone of residence with one exception: Zone 10 residents scored the road's performance for cyclists and pedestrians well above the overall mean.
